★ Hunter Special Tent Packages ★

Alaska Tent & Tarp has combined the most popular wall tent sizes and features into three easy packages with our Hunter Special wall tents. The Hunter Special packages are generally in stock for immediate pickup or shipment. The standard features include: *10oz FR canvas, sod cloth, back window, zippered door, 4 1/2" oval stove jack, and a stove jack cover flap.* Add a pin-in mosquito net and a wall tent fly from our stock and you get a great wall tent without waiting for a custom-built tent.

The fire resistant (FR) canvas provides fire, water and mildew resistance on the walls and the eaves, while using natural canvas for the ends of the tent, allowing the tent to breathe. Every tent is hand crafted in Alaska with the rigors of the Arctic environment in mind.

~ Sod Cloth and Snow Flap ~

The sod cloth is a 10-12" strip of black, arctic-grade vinyl sewn around the base of the tent interior. It can combine with a ground cloth to better seal the perimeter on uneven ground.

Snow flaps are similar to the sod cloth, but are made from nylon and run to the outside of the tent. Snow can be piled on the flaps to seal and insulate the base of the tent in winter.
